ZEV Program States MOU

State Zero-Emission Vehicle Programs Memorandum of Understanding

WHEREAS, the Signatory States have adopted regulations requiring increasing sales of zero-emission vehicles (ZEVs), or are considering doing so; and

WHEREAS, accelerating the ZEV market is a critical strategy for achieving our goals to reduce transportation-related air pollution, including criteria air pollutants, mobile source air toxics and greenhouse gas emissions (GHGs), enhance energy diversity, save consumers money, and promote economic growth; and

WHEREAS, our states are committed to reducing air pollution, including the emission of GHGs and other air pollutants from the mobile source sector; and

WHEREAS, many of our states have obligations or otherwise seek to reduce GHGs consistent with science-based targets by 2050; and

WHEREAS, motor vehicles are among the largest sources of GHGs and criteria air pollutants that adversely affect the health and well-being of our citizens in all of our states; and

WHEREAS, providing transportation alternatives such as ZEVs will help improve air quality, reduce the use of petroleum-based fuels in the transportation sector, protect consumers against volatile energy prices, and support the growth of jobs, businesses and services in a clean energy economy; and

WHEREAS, an increasing variety of vehicles that operate on hydrogen and low-cost electricity are commercially available and have the potential to significantly reduce emissions of criteria pollutants and GHGs, enhance consumer choice, and allow for home fueling; and

In October 2013, eight Governors announced an initiative to put 3.3 million ZEVs on their roads by 2025 in order to:

- Reduce GHG emissions
- Improve air quality and public health
- Enhance energy diversity
- Save consumers money
- Promote economic growth

MOU Key Commitments

- Harmonize building codes to make it easier to construct new charging stations
- Lead by example by including zero-emission vehicles in public fleets
- Evaluate and establish, where appropriate, financial and other incentives to promote zero-emission vehicles
- Consider establishing favorable electricity rates for home charging systems
- Develop common standards for roadway signs and charging networks
- Develop an action plan that will include many of these strategies and others
- Create and participate in ZEV Program Implementation Task Force

MOU Action Plan

- Due to Governors in April 2014
- Specific recommendations for individual and multi-state actions to support MOU goals
- Intensive stakeholder process to inform development of Plan
- State-OEM “summit” meeting November 2013
- State-OEM Working Groups: Policy & Incentives, Infrastructure, Consumer Awareness, Dealer Engagement
- Infrastructure workshop February 2014 with utilities, PUCs, NGOs, state energy officials
- Stakeholder engagement will continue beyond release of Plan and into implementation phase
