

## State Report Card

*Criteria for Moving to Stage 2 on the Resilience Roadmap*

Thanks to the millions of Californians who are abiding by the Stay at Home order, the state has made significant progress in bending the curve. While we aren't out of the woods yet, we are in a position to begin the process of gradually reopening certain sectors of our economy in counties meeting certain criteria.

### **Background:**

On April 14, Governor Gavin Newsom [outlined six indicators](#) the state would consider when modifying the Stay at Home order. They include:

- Ability to test, contact trace, isolate, and support the exposed
- Ability to protect those at high risk for COVID-19
- Surge capacity for hospital and health systems
- Therapeutic development to meet the demand
- Ability of businesses, schools, and childcare facilities to support physical distancing
- Determination of when to reinstitute measures like Stay at Home

On April 28, the Governor also announced four ["Resilience Roadmap Stages"](#) that California would use to guide its gradual reopening process. The four stages are:

- Stage 1: Safety and Preparedness
- Stage 2: Lower Risk Workplaces
- Stage 3: Higher Risk Workplaces
- Stage 4: End of Stay at Home Order

California has been in Stage 1 since the statewide Stay at Home Order took effect on March 16. Data suggests that Californians' actions to stay home over the past month and a half have stabilized the curve as well as ICU hospitalizations. This is why today, the Governor has announced that the state will move to Stage 2 to gradually reopen some lower risk workplaces with some adaptations. The following section outlines progress made in order to confidently move to the next stage.

**Reminder: Until California is protected, our actions will be aligned to achieve the following:**

- Ensure our ability to care for the sick within our hospitals
- Prevent infection in people who are at high risk for severe disease
- Build the capacity to protect the health and well-being of the public
- Reduce social, emotional, and economic disruptions

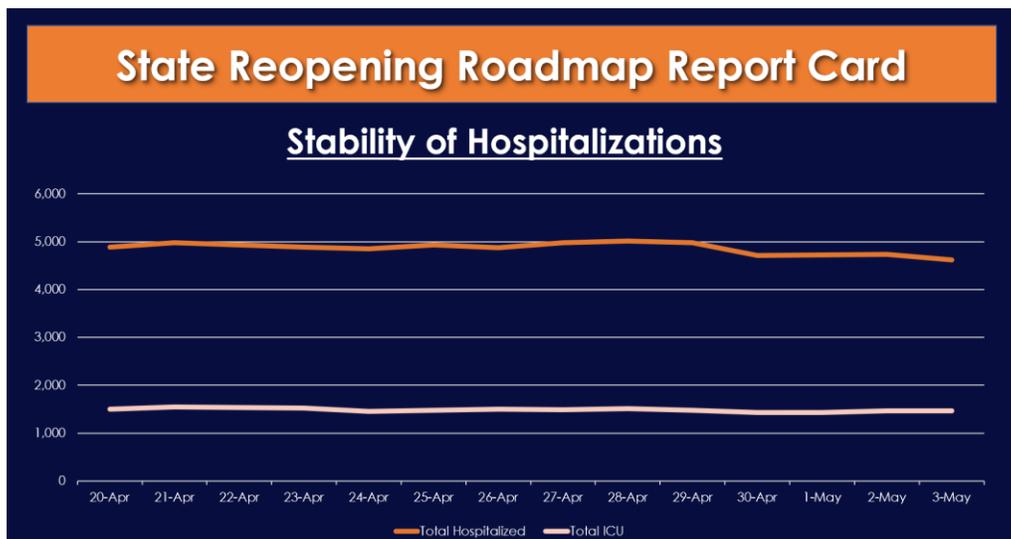

| California Reopening Roadmap Report Card |             |
|--|-------------|
| Key Metrics                              | On-Schedule |
| Stability of Hospitalizations            | ✓           |
| Personal Protective Equipment Inventory  | ✓           |
| Healthcare Surge Capacity                | ✓           |
| Testing Capacity                         | ✓           |
| Contact Tracing Capability               | ✓           |
| Public Health Guidance in Place          | ✓           |

**Stability of Hospitalizations**

California has seen a stabilization and modest decline of its COVID-19 ICU rates over the past few weeks.

## **Personal Protective Equipment Inventory**

California has worked since the beginning of this pandemic to secure PPE to fight COVID-19.

On-Hand Today:

- 18.2 million surgical masks
- 5.8 million face shields
- 7.2 million gloves

Ordered:

- Hundreds of millions of surgical and n95 masks

## **Surge Capacity**

California moved quickly to prepare for a possible COVID-19 surge and that early action has paid off. The state has:

- Prepared 14 facilities statewide ready to accept patients
- 2,072 beds ready to accept patients
- 10,000+ ventilators throughout the state not in use

## **Growing Testing Capacity**

California has worked around the clock to expand its testing capacity – and the state has made significant progress. The state has:

- Met its May 1 testing goal of 25,000 a day
- Standing up 86 new sites across the state, especially focused on rural areas

## **Expanding Contact Tracing Capabilities**

California is expanding its contact tracing capacity to help mitigate the spread of the virus. The state:

- Is rapidly identifying up to 10,000 individuals to serve as contact tracers
- Launching a statewide virtual training academy
- Launching a statewide data management platform
